DANIEL GRANGER – KYLE SWOBODA

Design Presentation: 18

FOR PUBLIC RELAEASE: 07/22/2020

robbygordon I know the answer, First and Foremost it's a horrible Rear Suspension Geometry... Massive amount of scrub radius, Rear hub design that doesn't share the load on the Bearing so it broke the end of the Stub Axle off or stripped the nut. All in all this is what happens when quad designers build a UTV. @speedutv we designed TRophy Trucks, Dakar Rally Vehicles and @stadiumsupertrucks so with Geometry and strength we got this 🤖🤔
