## Steering Rack

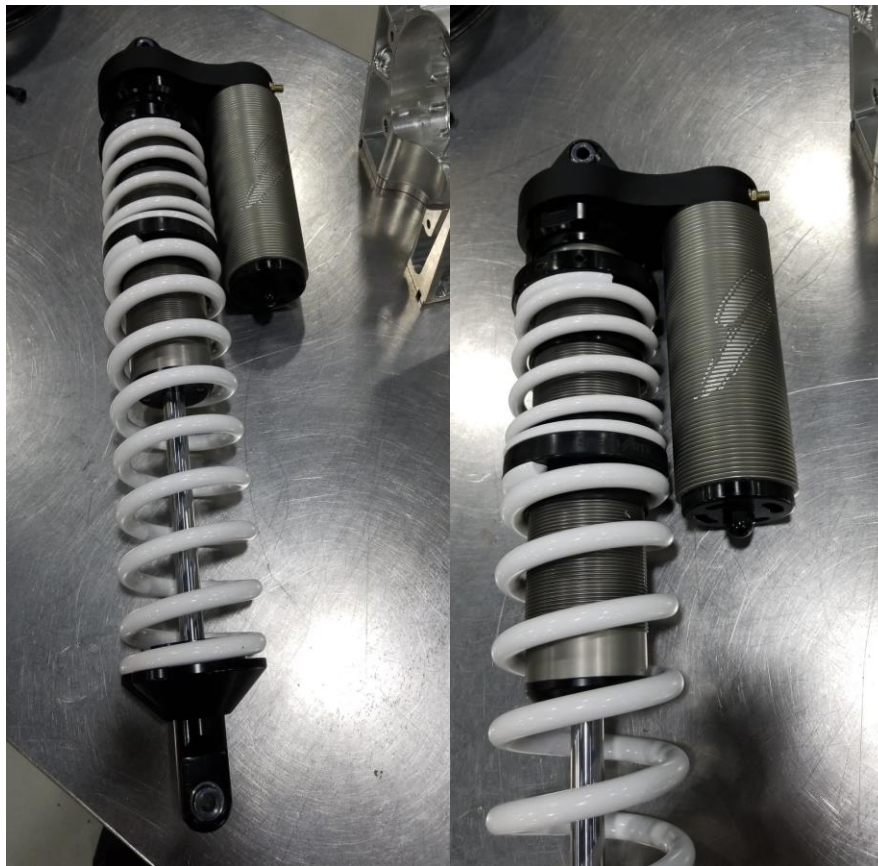

- Hydraulic steering
- 1.75:1 Ratio
- Less than 0.5" of bump steer

### Shocks

- 3.25" Internal Bypass
- 12" stroke
- 360 Degree clockable reservoir

## Upright Assembly

- Forged aluminum upright
- Universal hub and bearing
- Fully shouldered bolts

### Upright Assembly

- Forged aluminum upright
- Universal hub and bearing
- Fully shouldered bolts

**Brake Caliper in RG  
Wheel**

Turbo

### Blow Off Valve

Different filter  
attachments  
available: horn,  
filter fully  
contained

## Light Bars

- 3 different options

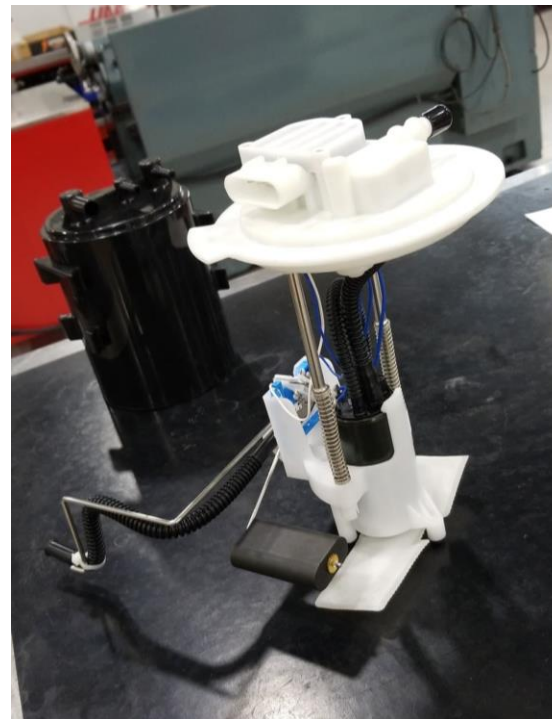

### Full Production Fuel Tank

## Fuel Pump and Charcoal Cannister

**250GPM @0.3MPa  
For 300HP on E-85**

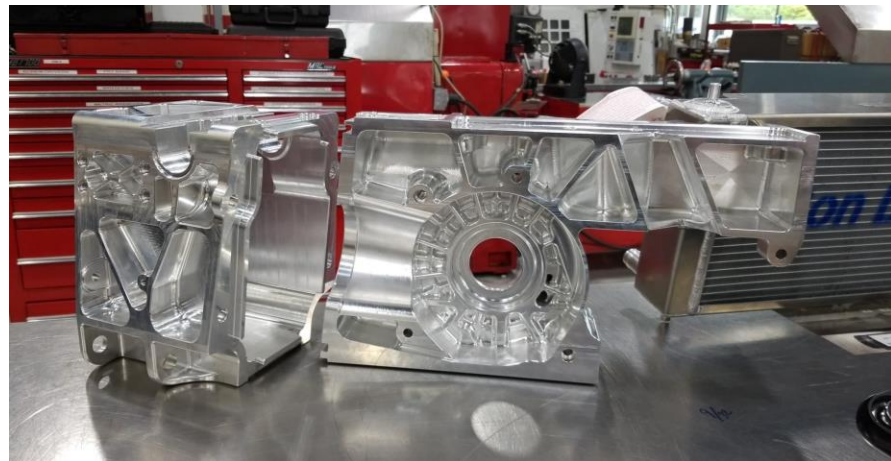

## Bulkhead

- Patented Trophy Truck (Unicorn) Inspired Bulkhead
- Integrated differential, steering rack and suspension pivots

Winner was selected with most likes using the hashtag #myspeedutvwrap

Winners name:

Dallas Cotts ( From Arizona)

Instagram Handle:  
@dc\_soonersfan

His custom wrap picture had 183 likes

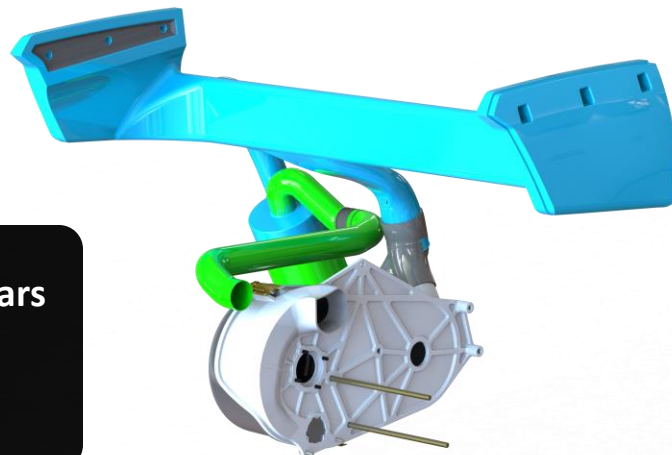

**CVT Air Inlet Tubing as well as air filter**

What air box are the Speed cars going to have?

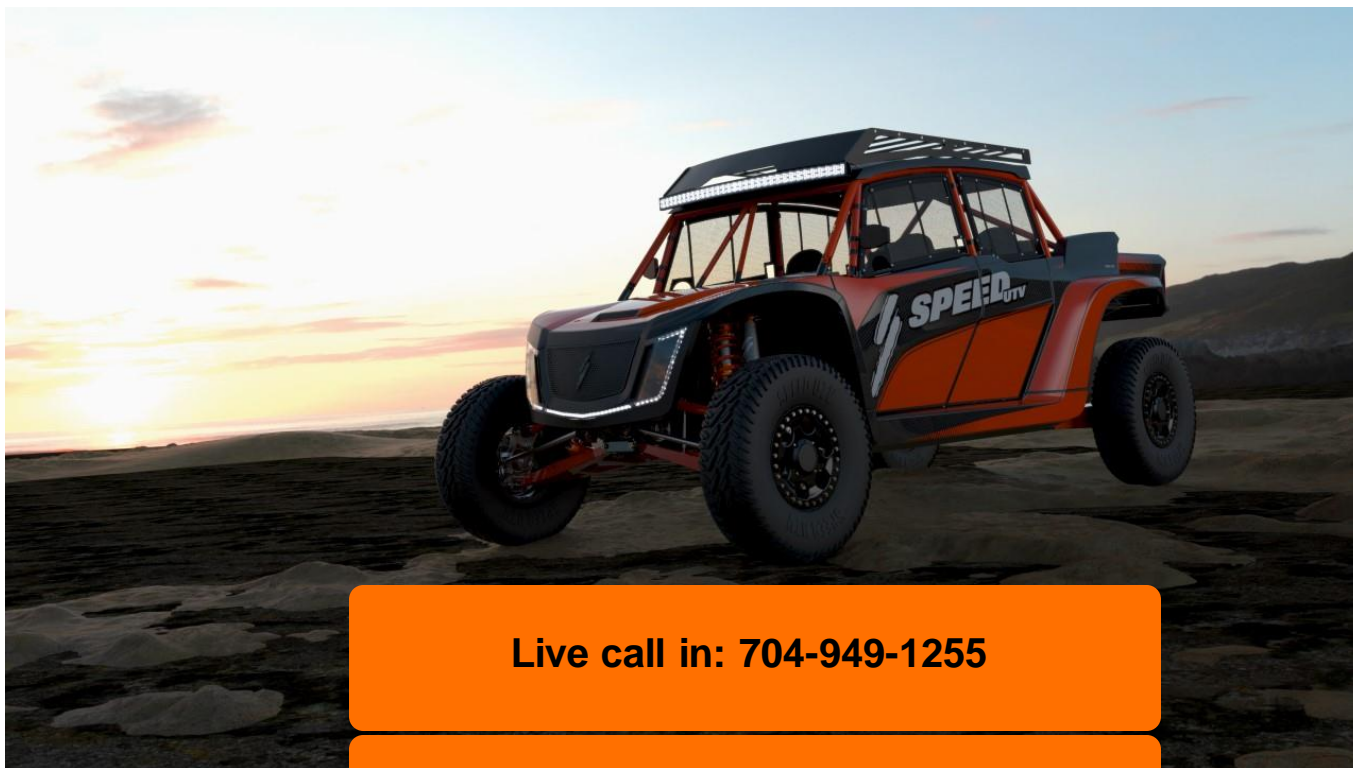

The air Box is a speed design

**On the enclosed cab will the radiator be in the front of the car? Or are we able to just put the for the air-conditioning in the front to emminate some of the heat trasnfer to the cab?**

**Yes, the entire car cooling stack moves to the front of the car. This is to ensure the cooling stack gets good air flow as the cab blocks the back. The interior of the cab will be sealed well and will reduce any heat transfer to it.**
